Transports
Metropolitans
de Barcelona

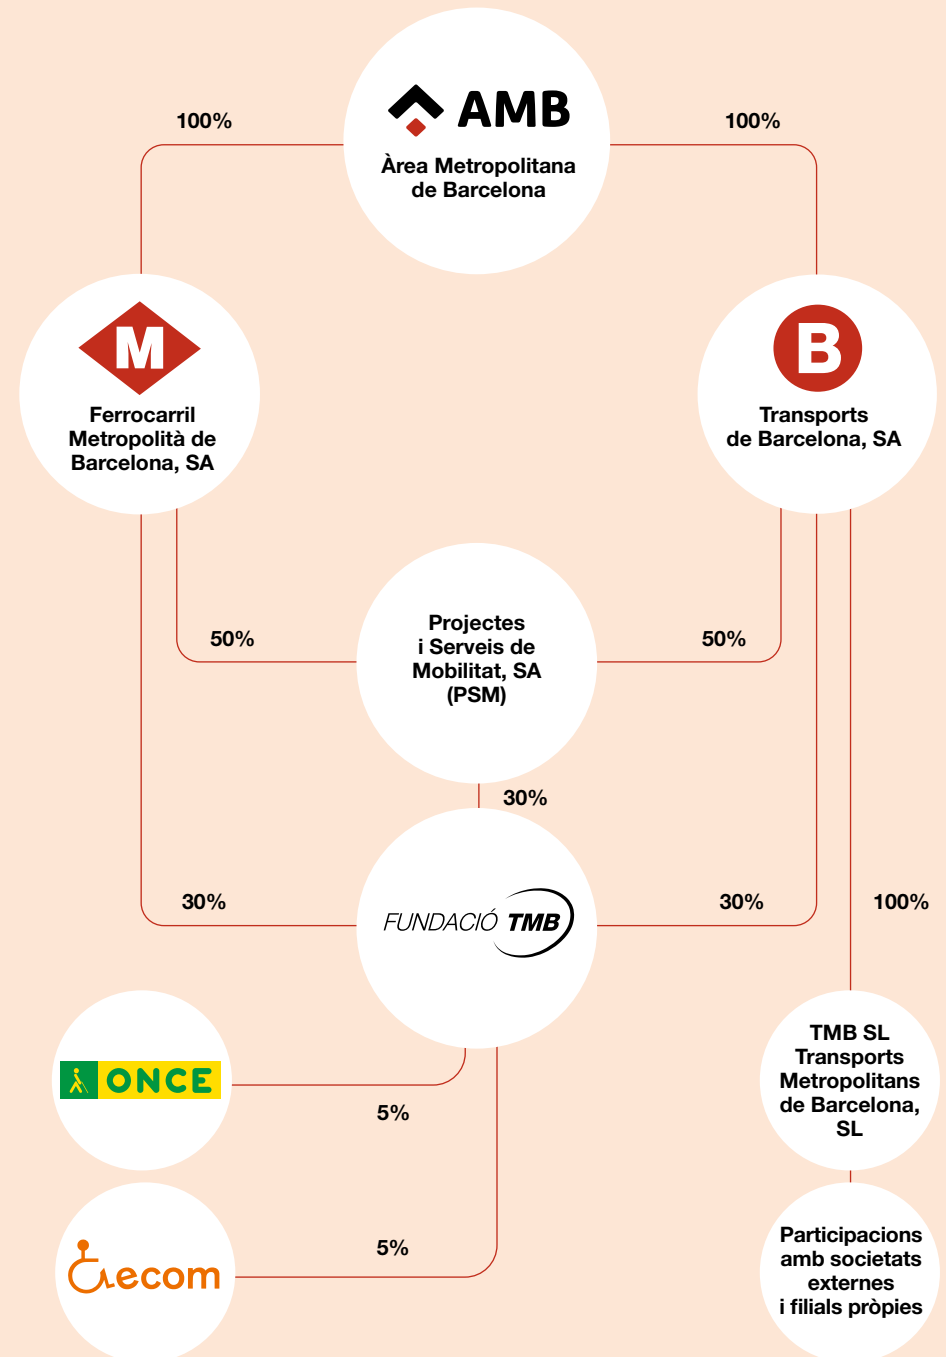

2025

What is **TMB**?

Transports Metropolitans de Barcelona (TMB) is the joint name of the companies **Ferrocarril Metropolità de Barcelona, SA** and **Transports de Barcelona, SA**, which manage the metro and bus network in the Barcelona metropolitan area.

It also includes the companies **Projectes i Serveis de Mobilitat, SA**, which manages the Montjuïc cable car; **Transports Metropolitans de Barcelona, SL**, which manages fare products and other transport services, and the **Fundació TMB**, which looks after TMB's historical heritage and promotes the values of public transport through social and cultural activities.

Global activity 2024

TMB provides services in Barcelona and 10 other municipalities in the metropolitan area.

It is the main public transport operator in Catalonia and a leading company for public mobility in Europe and the world.

Recovery in passenger figures

2024 saw continued growth in the demand on TMB networks, and the year ended with a new record number of passengers, also on the metro network.

Specifically, 687.8 million passengers were transported on the TMB network, representing a growth of more than 40 million more than the previous year (+17.7 %).

Mission

TMB's mission is to offer comprehensive mobility services, including metro and bus services, which:

- Contribute to the **improvement of mobility for the general public** and sustainable development.
- Guarantee the provision of an **excellent service** to the service to general public.
- Strengthen **equal opportunities and social responsibility policies**.
- Make **efficient** use of public **resources**.

ZERO EMISSION

Vision

TMB aims to be a benchmark public mobility company in the world:

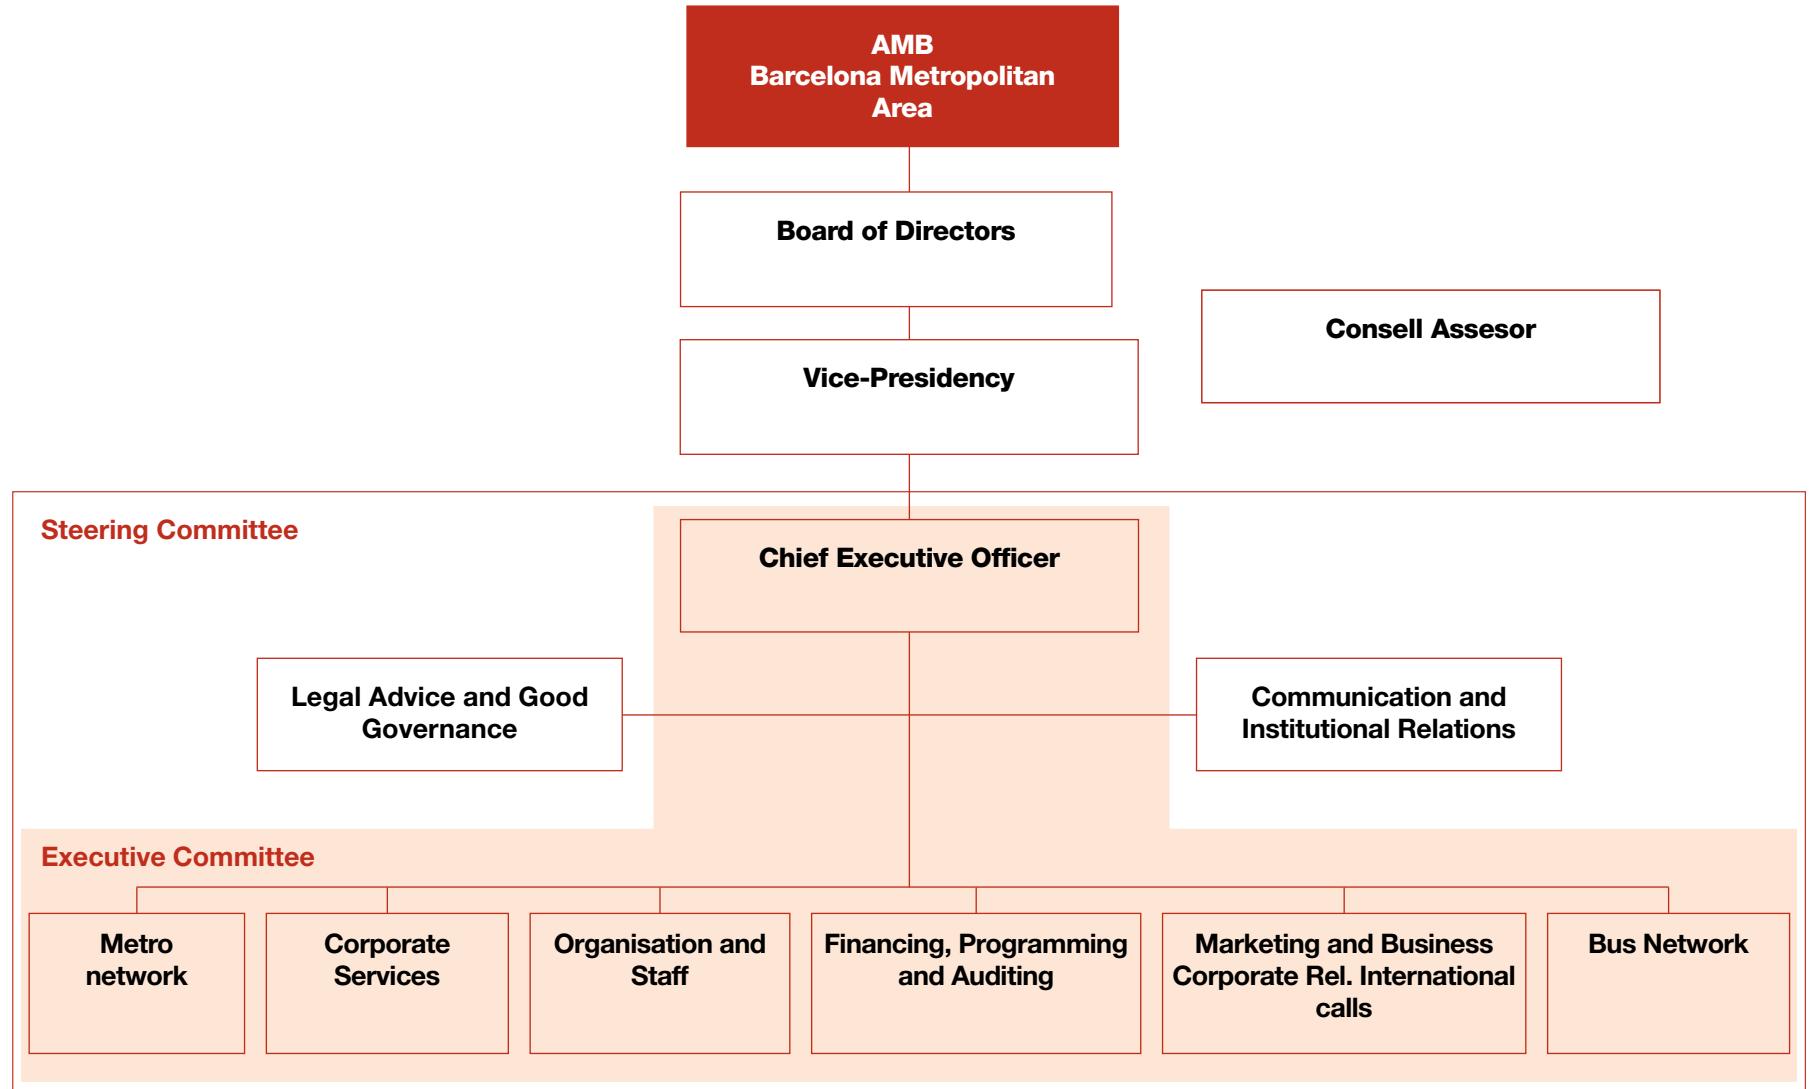

- For its integrated management of public, metro and buses and other mobility modes and services.
- For its commitment to urban sustainability and the environment.
- For the technical quality it offers and for the quality perceived by the public and its stakeholders.
- For the efficiency of its processes and the optimisation of the use of resources.
- For innovation and the efficient application of technology as a lever for service improvement.
- For the values that employees convey through their behaviour and the excellence of their work.
- For their commitment to society, to the general public, stakeholders and staff.

Values

The values guiding TMB's activity are essential to comply with its commitment to society: workers, the general public, and stakeholders:

- Commitment to public service and excellent service.
- Efficient management.
- Socially responsible behaviour.
- Values of equal opportunity, diversity, integrity, honesty and respect.
- Transparency.
- Commitment.
- Leadership and teamwork.
- Recognition, equity and personal and professional growth.
- Ambition for innovation, cutting-edge technology and constant improvement.

Òrgans d'administració i gestió de TMB

TMB services and products

Metro

- Metro services directly managed by the AMB.
- Ancillary income linked to Metro's activity and assets.
- Subject to the Contract with the ATM.

Bus

- Bus services directly managed by the AMB.
- Ancillary income linked to 'Bus's activity and assets.
- Subject to the Contract with the ATM.

Mobility Services

- Public mobility services directly managed by the AMB (AMBICI bike-sharing services...) and other mobility services (cable car, tourist bus...).

External advice and Overseas Business

- Engineering and consultancy services in TMB's activities.
- Operation of bus services and other mobility systems through competitive tendering.
- Other businesses that can bring benefits to TMB.

TMB Foundation

- Promotion of public transport and sustainable mobility.
- Promote social responsibility policies in all TMB group companies.
- Develop social, cultural, educational and civic projects.
- Conservation and dissemination of the historical heritage of public transport.

AMB : Àrea Metropolitana
de Barcelona

The Integrated Fare System aimed at people who are resident in Barcelona

Allows the use of all different means of transport (metro, city buses, suburban buses, metropolitan buses, etc.) and interurban, tramway, Railways of the Generalitat de Catalunya and Rodalies de Catalunya (Suburban Rail), with a single transport ticket, does not penalise travellers when they transfer to another means of transport. This system allows the use of four different means of transport and three transfers within the established time and space constraints of the card.

The Shared Fare System

Hola Barcelona Travel Card, aimed at non-residents. Unlimited travel for 2, 3, 4 or 5 days with a single card.

Public transport is one of the best ways to get around Barcelona. For this reason, TMB created the card to travel conveniently around the city. The Hola Barcelona card is a single-person ticket that allows non-residents of Barcelona to use the card as many times as they want: metro and bus (TMB), rail (FGC, zone 1), Montjuïc Funicular (TMB), tram (TRAM) and Cercanías de Catalunya trains (zone 1).

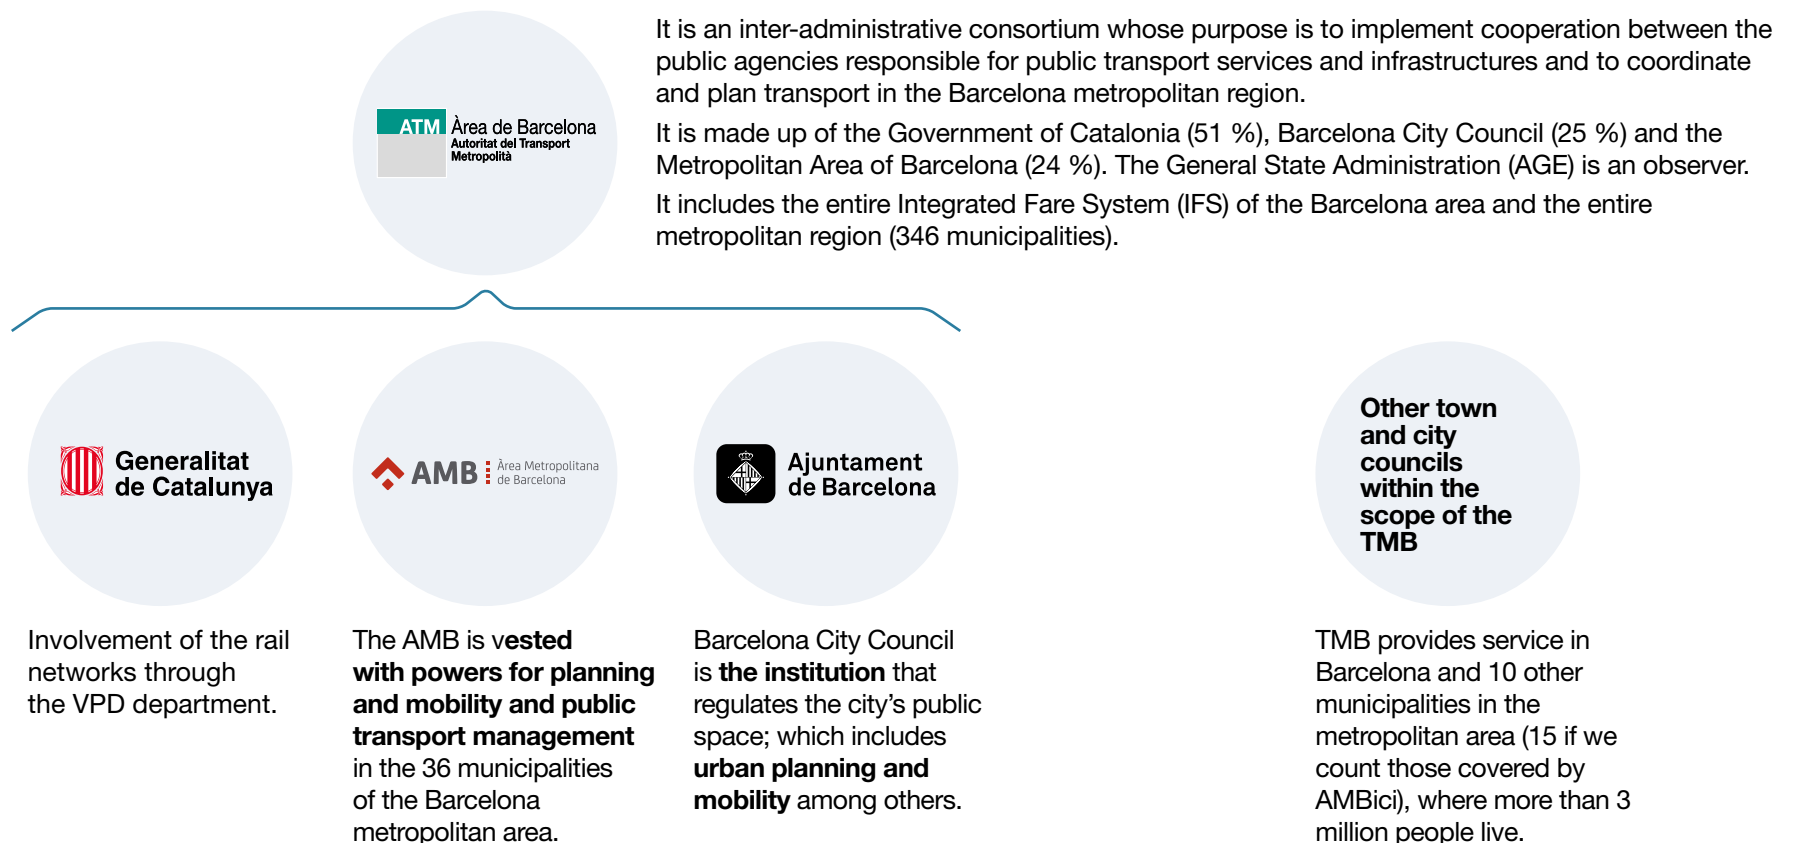

Institutional environment

Political environment

Transports Metropolitans de Barcelona

(TMB) takes as a frame of reference the master plans and mobility plans for the institutions with authority in public transport and mobility:

Institutions

Mobility in TMB's area of influence

The demand for collective public transport in the Barcelona area's Integrated Fare System was set at 1,167.7 million journeys in 2024. Of the total number of journeys made, 687,230,000 were with the TMB, accounting for 58.9%.

A management model based on commitment and social responsibility

TMB works to improve the city and its environment as the main operator of its mobility, taking on the future challenges generated by the changes.

The fundamental criteria of its management are: a culture of innovation, constant improvement, excellence and transparency.

Its main aim is to be model public sector company.

To this end, it promotes all its action programmes, environmental protection, energy saving, the promotion of social inclusion and the promotion of accessibility policies, vectors of sustainable and inclusive mobility.

Accessible and approachable

TMB has developed a set of digital tools designed to inform, serve to and interact with public transport users. Buying tickets online and mobile validation are other digital services we offer through our channels.

Face-to-face and telephone customer service:

Europe's cleanest bus fleet

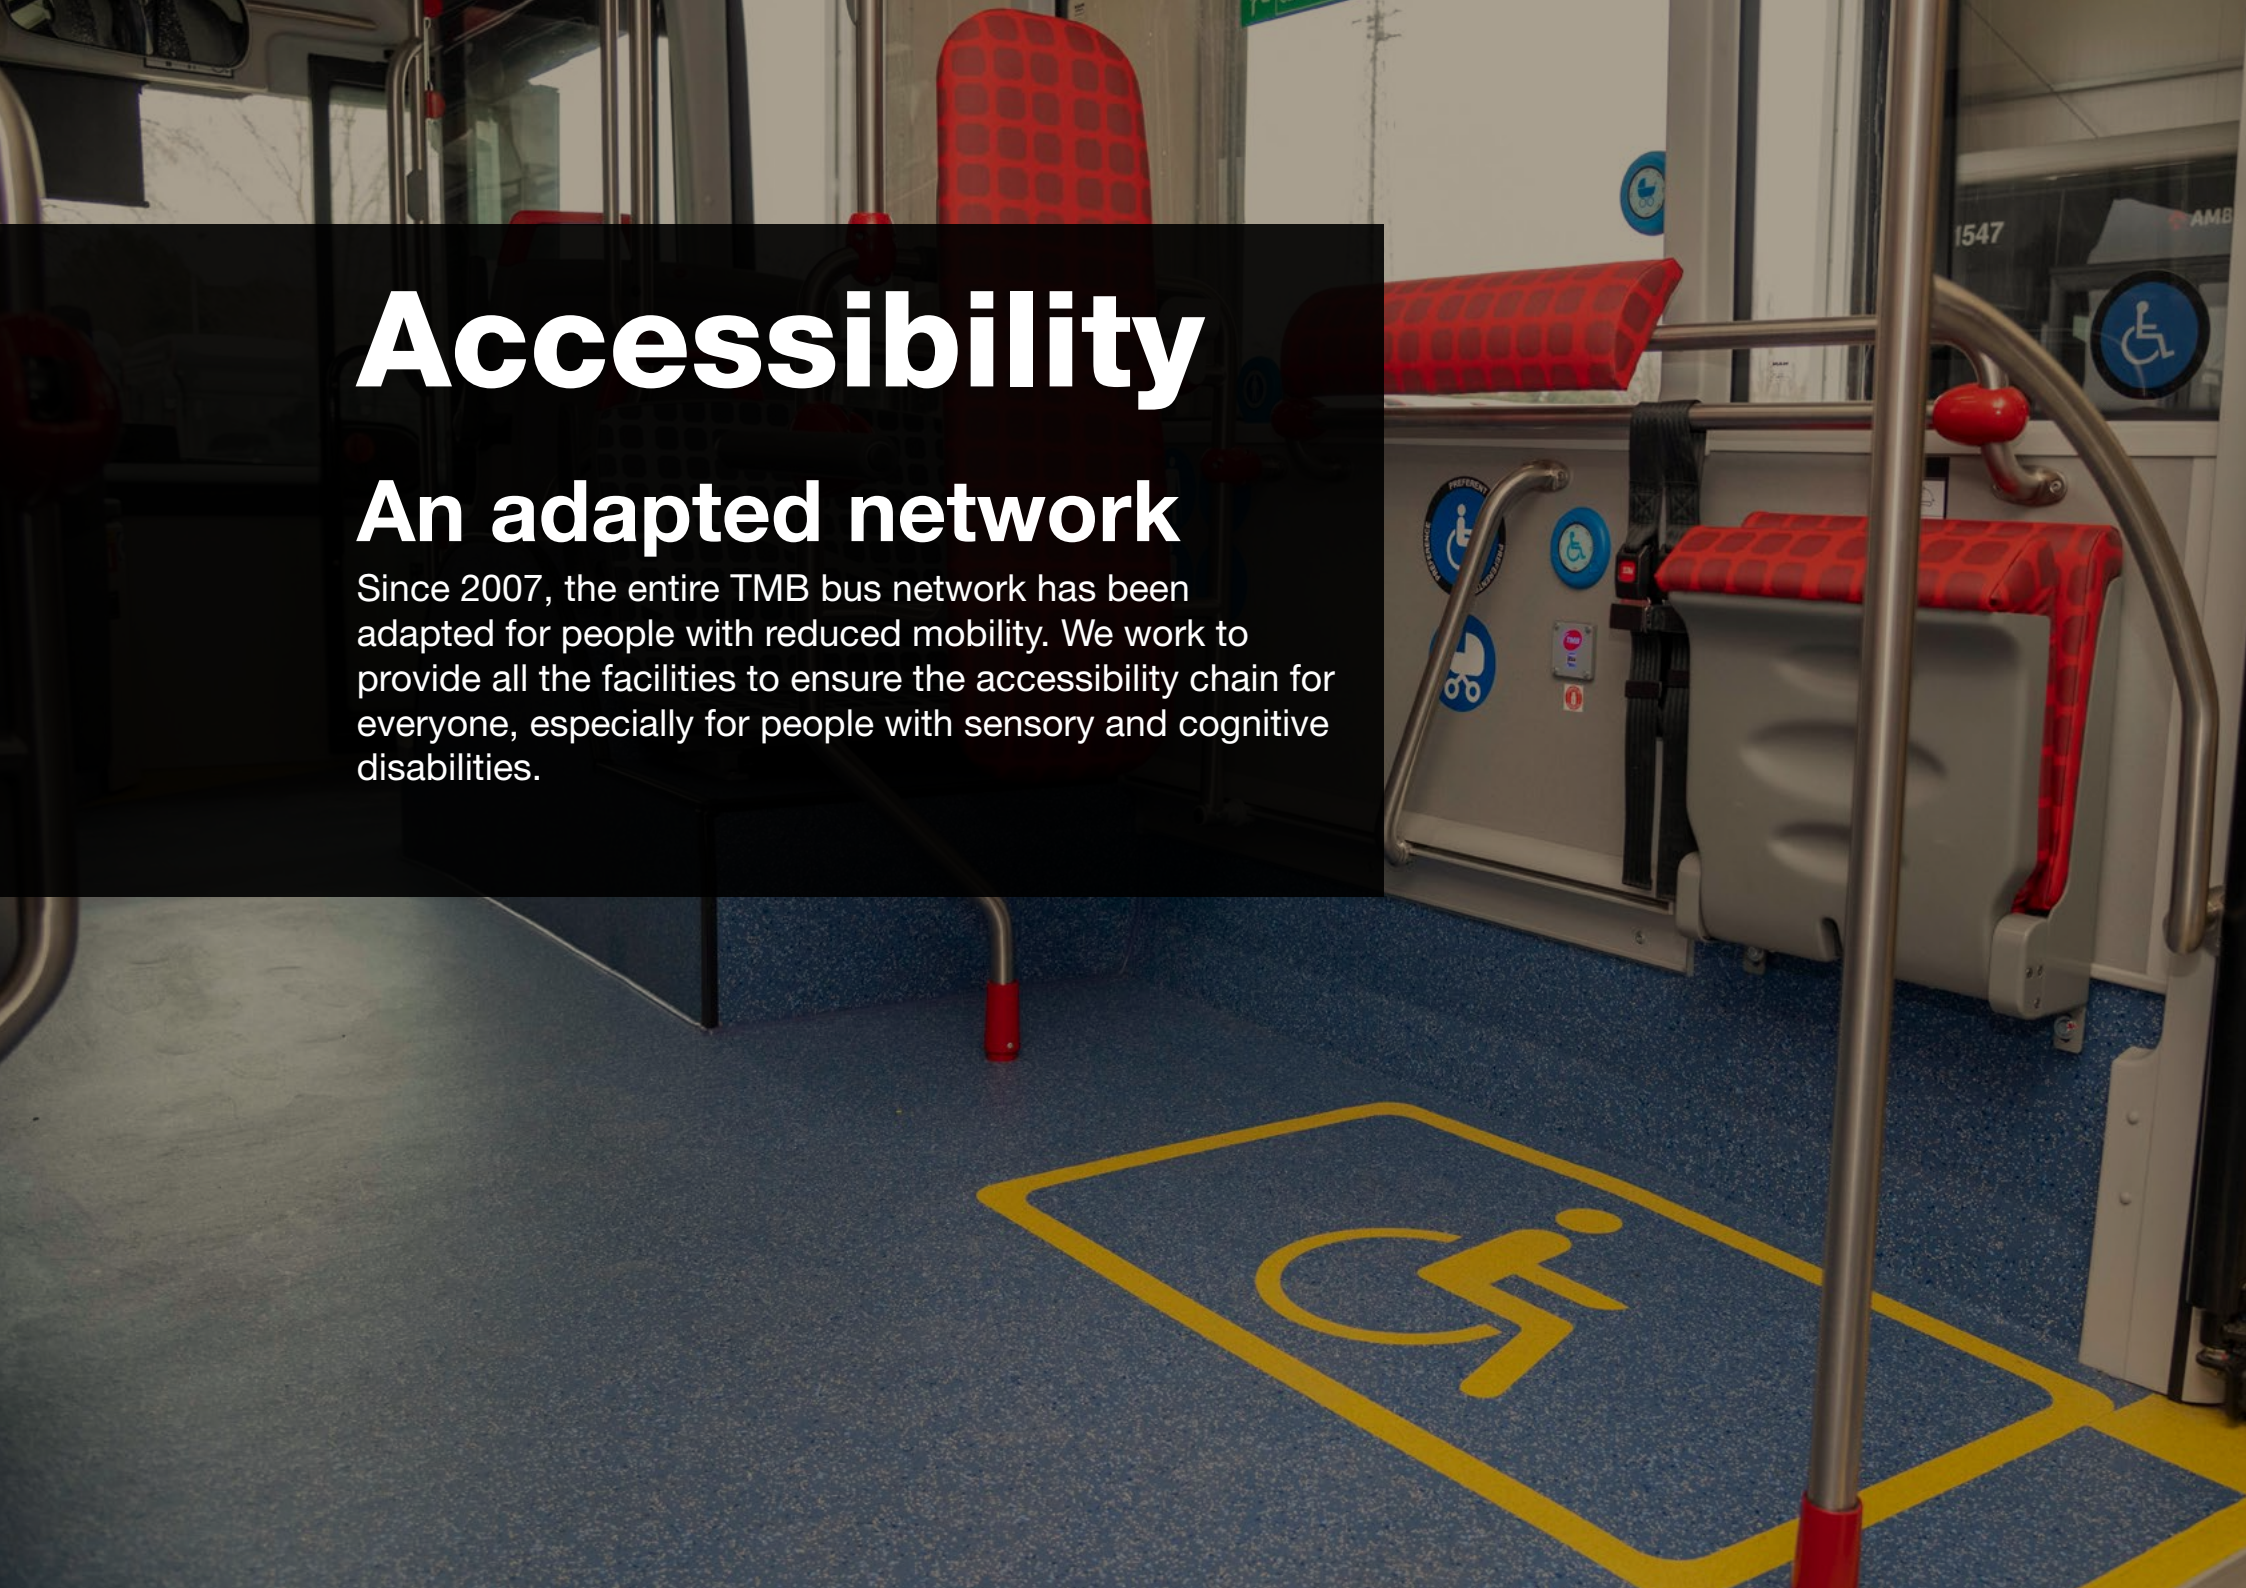

TMB's commitment to sustainability and improving air quality also makes it possible to have the cleanest fleet of buses in Europe. Every year, TMB replaces buses that have reached the end of their useful life of 14-15 years with more innovative and efficient ones to reduce pollutant emissions.

Accessibility

An adapted network

Since 2007, the entire TMB bus network has been adapted for people with reduced mobility. We work to provide all the facilities to ensure the accessibility chain for everyone, especially for people with sensory and cognitive disabilities.

The bus network that the 21st century city deserves

Where we come from

A network inherited from the tram network of a century ago. As Barcelona grew, the lines were extended and overlapped to the point of creating an illogical network, with redundancy between lines and routes that hampered speed and frequency. It did not guarantee a good connection between different areas and the network was not very user-friendly and was hard to read on a map.

Where we're headed

Once implemented, the new bus network will be made up of 28 high-performance lines, 17 vertical (sea-mountain), 8 horizontal (Llobregat-Besòs) and 3 diagonal lines. They are complemented by 36 conventional and 37 proximity lines.

Bus network characteristics

Easy

Ease of use: lines with more direct and straighter routes, designed more efficiently and logically.

Connected

Maximum connectivity: it reaches all parts of the city and improves connections with other bus lines and other public transport.

Frequent

More frequent service: buses run more often and with a wider time slot, which shortens waiting times at stops.

Interchangeable

Interchange areas: located where vertical, horizontal and diagonal lines cross, in both directions, for easy, simple and convenient connection from one line to the other.

Metro

Universität

Barcelona metro network

The Barcelona metro network has eight lines (five conventional lines and three automatic lines) and also includes the Montjuïc Funicular is now in service. In total, **165 stations** and more than **165 trains** running at rush hour.

8 lines

5 conventional

3 automatic

125.4 km of track

165 stations

165 trains

Source: TMB (2024)

The TMB metro network connects Barcelona with seven cities in its metropolitan area.

*The distance is measured taking into account the track in commercial service.

**The time between trains of 6'04" applies to the individual section of L9 North and L10 North; for the common section it is 3'02".

*** The time between trains of 7'22" applies to the individual section of L9 South and L10 South; on the common section it is 2'06" and 5'16" (asymmetric).

	Length km*	Number of stops	Trains at rush hour	Frequency (peak hour)

Metro Control Centre

CCM

It operates all year round, 24 hours a day, and uses the most advanced technology to ensure the proper functioning of the metro.

The CCM manages all the resources involved in the operation of the metro network in an integrated manner:

- **The movement of trains.**
- **Assistance at stations.**
- **The energy operation.**
- **Information to clients.**

The security of the network is managed from the Security and Civil Protection Centre (CSPC), also located in the same building as the MCC.

An adapted network

Currently, 94% of the TMB metro network is adapted for people with reduced mobility.

We work towards full accessibility by incorporating elements that facilitate access and use of the network for everyone, thinking of the diversity of the customer with a 360° vision (people with visual and hearing disabilities, people with intellectual disabilities, adults and children) and thus improving essential features such as acoustic and screen information, signage and preference in the use of reserved spaces and access to trains.

A metro network with comprehensive security

Security of people and facilities: a security model adapted and flexible to new challenges, efficient, sustainable, innovative and coordinated with public security resources.

Traffic safety: a railway safety culture where everyone is involved in identifying and controlling the risks of the activity in order to mitigate and minimise them and guarantee the safety of employees, customers and the service.

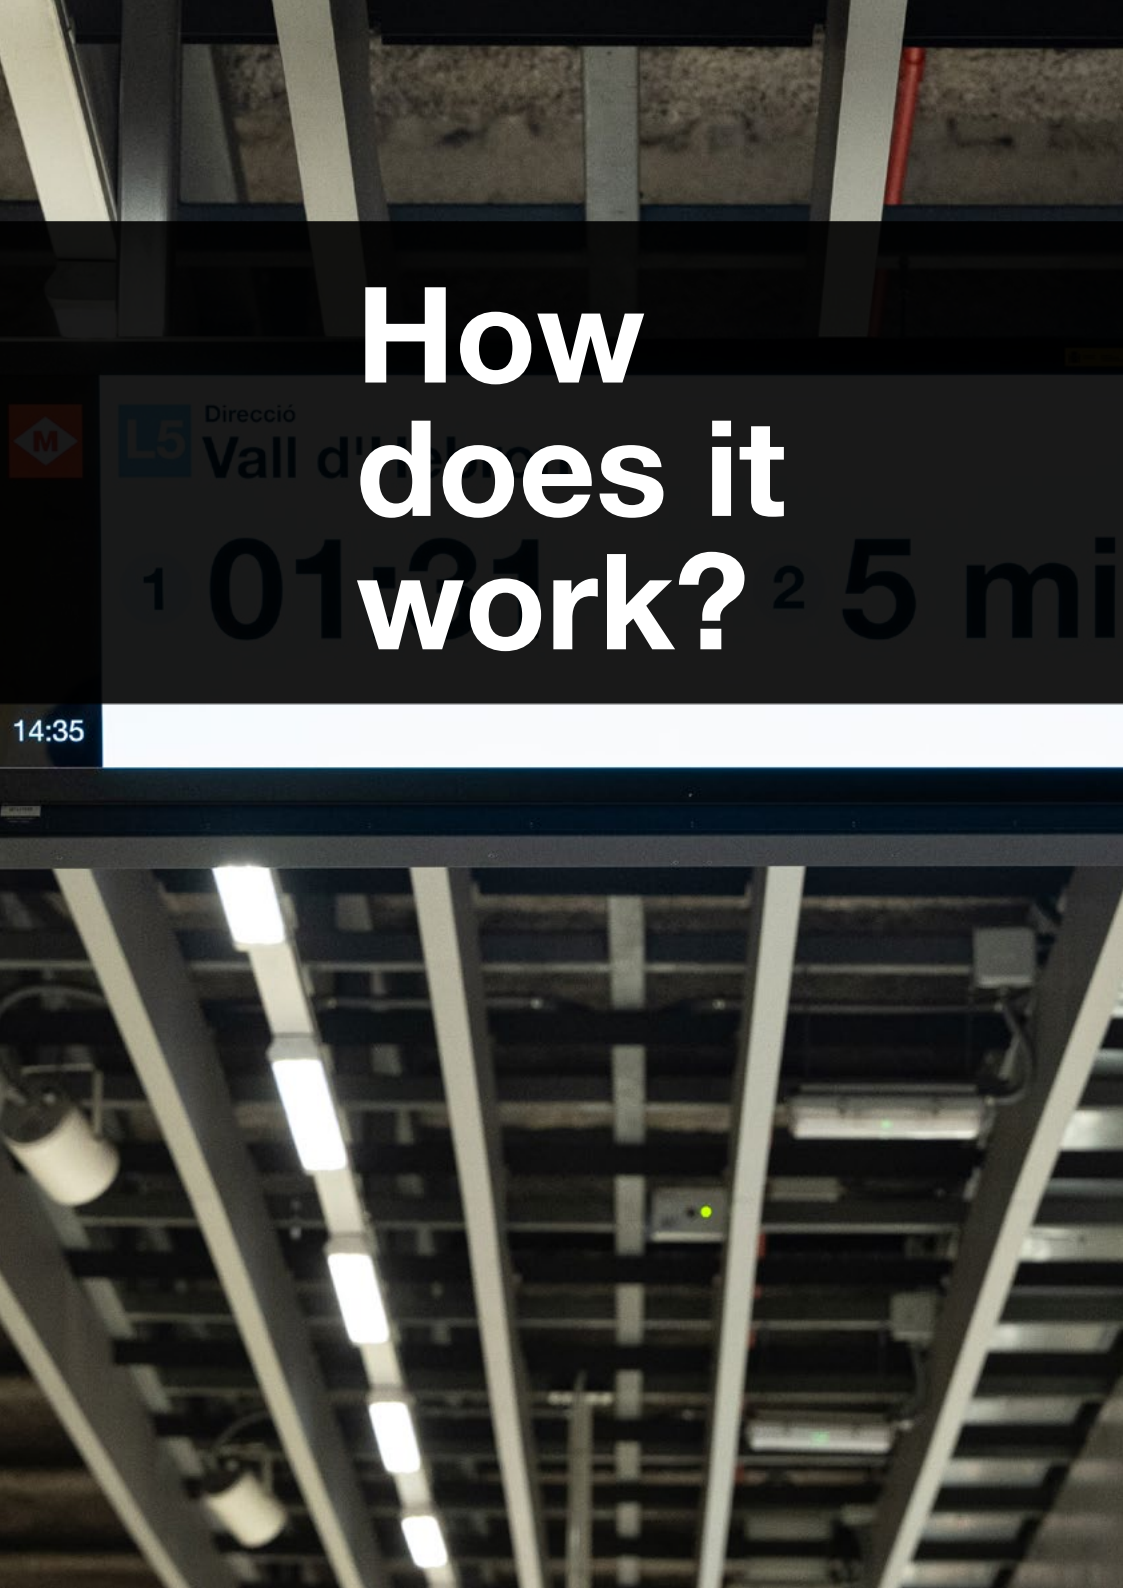

Employee safety: an occupational risk prevention policy that contributes to improving the health, safety and well-being of employees as a necessary condition for the company's efficiency and sustainability.

The automatic metro, a better service

Technology for maximum safety, more flexibility, more reliability, more efficiency, more information and personalised service.

45% of Barcelona's metro network operates with driverless trains.

How does it work?

The automatic metro runs with an automatic driving system that allows it to operate without personnel on board.

Advanced technology enables remote control of line resources, facilities and infrastructure such as trains, lifts and escalators, ticket dispensers and toll lines.

Trains are located, controlled and programmed from the Metro Control Centre (MCC).

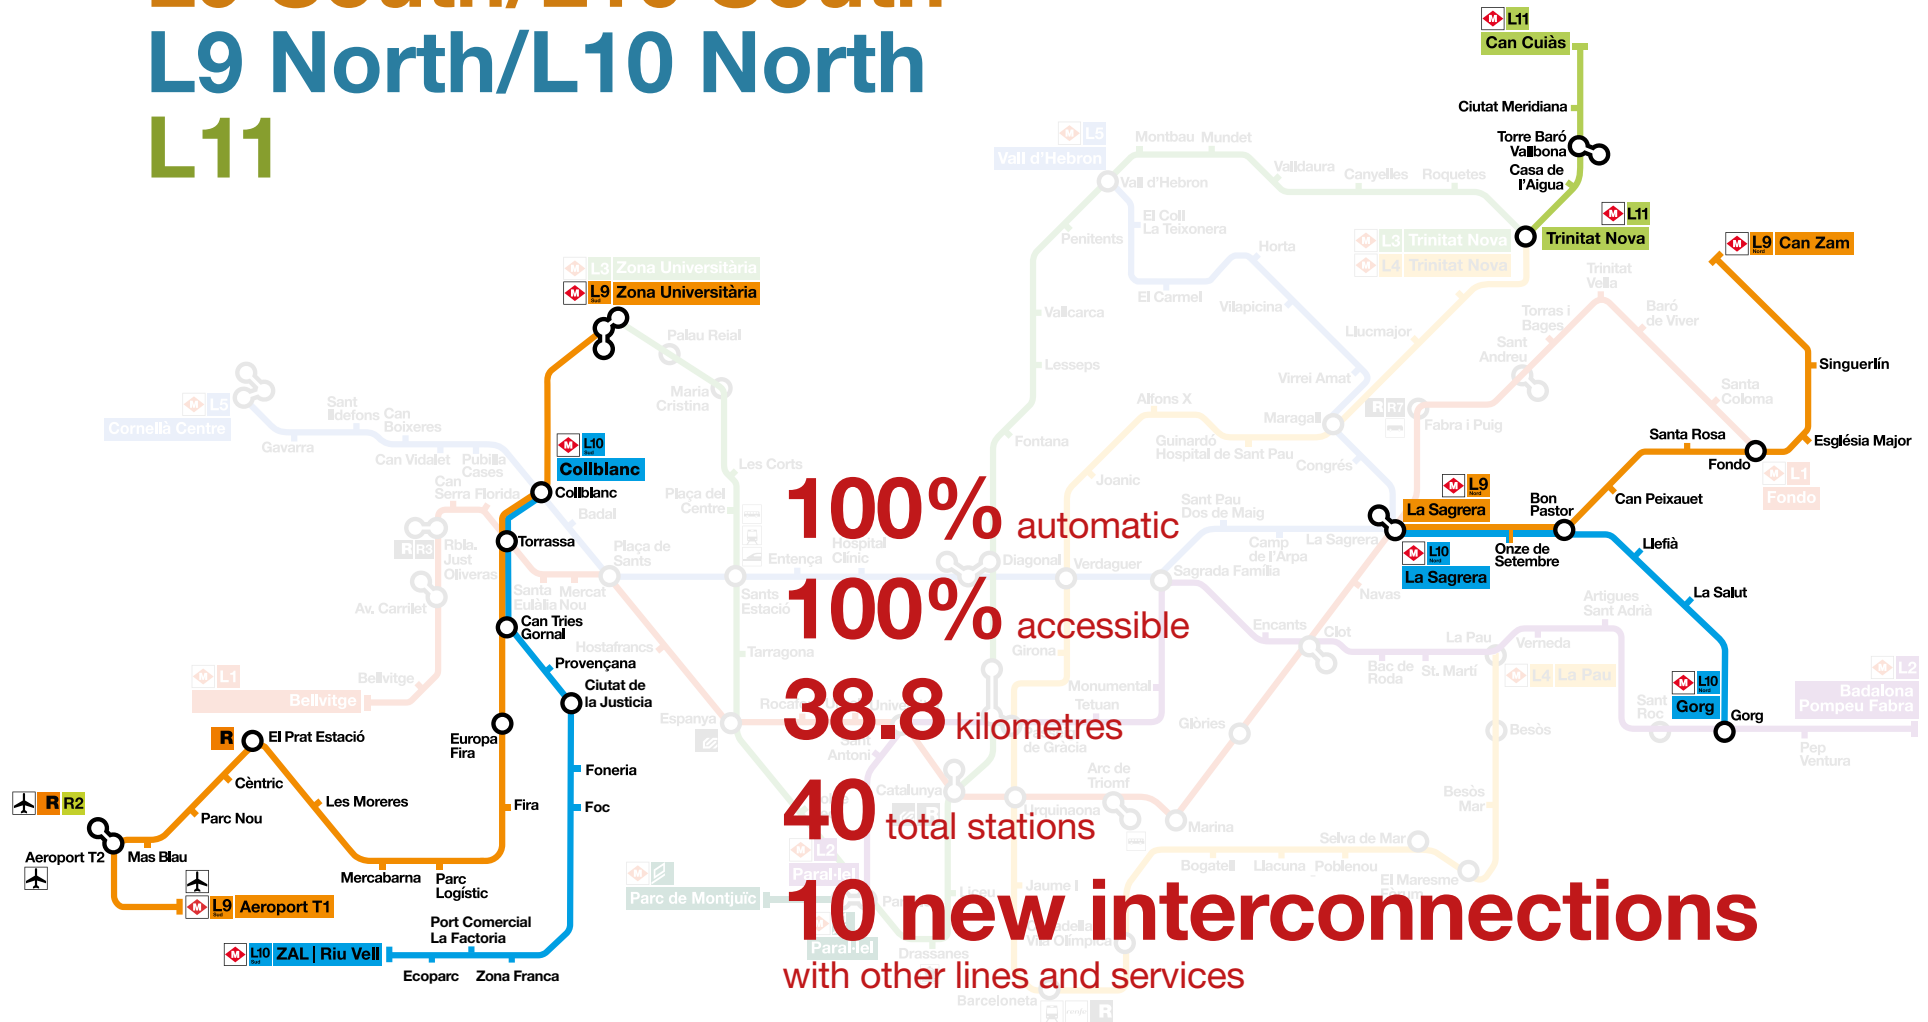

Trains run at the assigned speed and stop at stations according to a predetermined schedule, which may vary according to the day and time slot. However, the MCC may intervene at any time.

Tourist Transports, Hola Barcelona and other shared services

TMB manages tourist services and tourist transport in the city under the brand **Hola Barcelona**:

- Barcelona Bus Turístic
- Barcelona Night Tour
- Barcelona Christmas Tour
- Montjuïc cable car
- Hola Barcelona Travel Card
- Catalunya Bus Turístic

The first **Hola Barcelona Store** was opened in 2023, located in Plaza Cataluña metro station, with the aim of promoting and marketing TMB's tourist and transport services.

Barcelona Bus Turístic

The Barcelona Bus Turístic is the official tourist bus of the city.

It offers two different routes to plan your visit to Barcelona with a single ticket, and also a night-time itinerary in summer.

2 itineraries

65 open-top double-decker buses

Barcelona Night Tour Bus
(Special night service in summer)

Barcelona Christmas Tour
(night-time route to discover Christmas decorations and illuminations)
